The performance

Social Tango Project believes in the power of dance. Through live **performances, music, and films**, the company presents tango as what it has always been: an art of encounter, open to everyone

The production “*Social Tango, a dance journey*”, reveals how **tango builds a community** that celebrates the power of human connection. This collective spirit is authentically reflected on stage through 10 professional dancers, 5 musicians and the collaboration with each local tango community where the company performs.

After every show, the experience continues with an on-stage **class** and **milonga**, breaking down barriers between audience and performers and inviting people of all levels to join in the dance.

The residency

Since its founding, the company has cultivated inclusive spaces and created meaningful experiences that resonate far beyond the stage. Each **residency** is designed by artistic director **Agustina Videla** together with the host institution, and shaped around its audiences, its spaces.

Residencies may bring together a **photography exhibition** by renowned Argentine photographer **Nora Lezano**, screenings of the company's **award-winning films**, new creations developed with the local community, and **masterclasses** that open the company's practice to dancers of every background.
